

I'm thinking about either continuing my midterm project on the portfolio website or creating something new, possibly a website of a gallery of photos I've taken in different places and adding some sort of sound or music. For either direction, I would be utilizing Bootstrap, some JavaScript, and adding more features.

Here are some websites that gave me inspiration on the aesthetics:

<https://seanklingelhoef.com/>

<https://vanholtz.co/>

<http://ofplace.info/>

<https://tstng.co/>
